PROTON®
DATADEFENDER™ ATS

AUDIT TRACKING SYSTEM | TAMPER RESISTENT REPORT

CONSISTENTLY MAINTAIN AN AUDIT-WORTHY, MEDIA DESTRUCTION REPORT WITH NO LIMIT ON USERS OR MEMORY STORAGE!

- Simply log in, scan your hard drive serial number, and immediately populate the report with all necessary information
- Runs on a computer, laptop or tablet without requiring expensive third party hardware
- Reference destruction history for every data storage device processed, regardless of the Proton model
- Duplicate detection visually highlights any redundancies in destruction records
- No memory storage limitations so **unlimited** records can be maintained
- Rapid search function allows for immediate location of data in any field
- **Tamper-resistant**, self-locking database prevents information from being modified or erased
- Designed so you can continue using **DataDefender™ ATS** even if you upgrade your Proton equipment in the future
- Comments field provides for optional information entry to further customize tracking
- Unlimited number of users can contribute to the same project for collaborative destruction
